SAP S/4HANA SD Consultant

SAP S/4HANA | Order-to-Cash | EDI | Solution Design & Configuration

As a SAP S/4HANA SD Consultant with 8 years of experience, I specialize in delivering tailored, end-to-end order-to-cash solutions that align with complex business requirements. My expertise spans across SAP SD configurations, third-party logistics, EDI integration, and cross-functional collaboration. I thrive in dynamic environments, leading functional teams, mentoring peers, and driving seamless digital transformations. I'm now looking to further leverage my experience and passion for SAP technology in forward-thinking IT teams.

WORK EXPERIENCE

Accenture Solutions Pvt. Ltd. – Application Development Associate Manager - Bengaluru, India Dec 2023 – Jul 2024

Data Scientist

Designed and enhanced sales and logistics interfaces within SAP for streamlined order management and billing.

- Collaborated with stakeholders to understand core business needs and deliver customized SAP SD solutions.
- Led process analysis, solution development, and testing in SAP S/4HANA and CAR environments.
- Developed Proof of Concepts (POCs) to close functionality gaps.
- Authored functional specifications, test cases, and led quality assurance reviews.
- Mentored junior consultants and promoted a knowledge-sharing culture.

Deloitte USI – Senior Consultant (SAP SD) - Bengaluru, India Sep 2019 – Nov 2023

Led offshore implementation and support team for SAP SD Order Management and Billing.

- Designed and configured SAP SD modules based on client business processes.
- Performed end-to-end integration testing with SAP FI and MM modules.
- Guided technical teams with documentation, system configurations, and training.
- Conducted user training, issue resolution, and hypercare support post-deployment.

Accenture Solutions Pvt. Ltd. – Application Development Analyst

Pune, India May 2016 – Sep 2019

- Handled daily SAP SD production support activities within defined SLAs.
- Executed LSMW data migration for customer master, material master, and CMIR.
- Analyzed issues related to pricing, billing, output, and text determination.
- Supported EDI processing (EDI 850, 855, 810) and solution documentation.
- Coordinated functional testing and created testing deliverables.
